

## Resistance Temperature Detectors (RTDs)

Resistance Temperature Detectors (RTD's). These detectors are frequently used in the plastics industries and many others. Care must be taken to eliminate moisture and vibration effects can be troublesome as well. Thermo Sensors provides the utmost in current state of the art in materials, techniques and research.

Thermo Sensors offers the Reliatemp RTD. This RTD features lifetime moisture free use as well as excellent vibration resistance.

Please refer to our order guide to assist in determining your needs. We can also provide technical design assistance and application suggestions. Give us a call.

### Introduction

For years Thermo Sensors Corporation has been furnishing quality RTD's used to control industrial processes worldwide. Being genuinely dedicated to furnishing materials to current state-of-the-art techniques; Thermo Sensors Corporation is constantly striving for innovation and improvement in all its products. An example is our development of Reliatemp, industries only lifetime moisture free RTD along with excellent vibration resistance, solving industries two main problems. We are dedicated to continue furnishing industry with precision high quality products.

The information in this section is designed to help you better understand RTD's and give ordering information in a clear and concise way.
